

Fotospeed

for every print

Installing and using your custom Printer Profile Instructions.

Photoshop and Lightroom

Fotospeed YouTube Channel

If you would like to see a video of these instructions we have also created free videos on the custom profiling process available on our YouTube channel.

The screenshot shows the Fotospeed YouTube channel page. At the top is a banner with the Fotospeed logo and the text "New Videos - Every Thursday". Below the banner is the channel's profile information, including the name "Fotospeed", 677 subscribers, and a "SUBSCRIBED" button. The navigation menu includes "HOME", "VIDEOS", "PLAYLISTS", "CHANNELS", and "ABOUT". The "Uploads" section is active, showing a grid of video thumbnails. The first row of videos includes "The Art of Composition with Charlie Waite", "Print Your Own Greeting Cards | FotoCards by...", "Kaiser LED Desktop Light for Photography & Videography", "Fotospeed Talks: De-Mystifying Black & White Printing", "Printing on Square Paper with Canon Pro 300 Printer", and "SOFT PROOFING in PHOTOSHOP // Fotospeed...". The second row, titled "Fotospeed - TUTORIALS", includes "SOFT PROOFING in PHOTOSHOP // Fotospeed...", "ICC Profiles and RENDERING INTENT when printing // ...", "Learn how to HARD PROOF Your Images in PHOTOSHOP...", "Print a CUSTOM PROFILE CHART on a MAC // ...", "INSTALL Print Profiles on a PC // Fotospeed Tutorial", and "INSTALL Print Profiles on a MAC // Fotospeed Tutorial". Each video thumbnail displays the title, duration, and view count.

Installing Profiles on a PC.

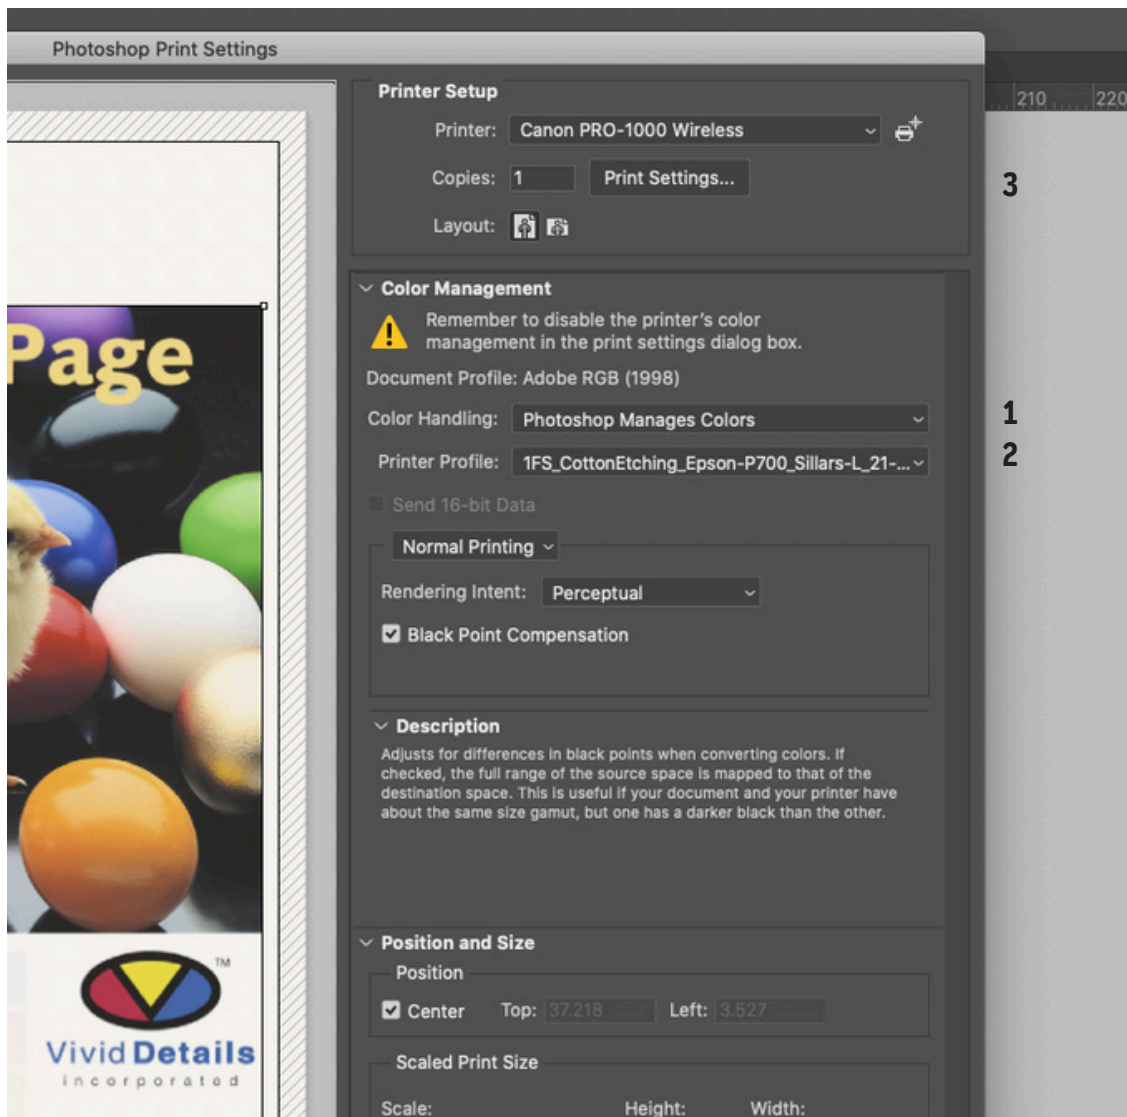

- Start by saving your profile from the email to your desktop.
- Then go to your file explorer and locate the profile.
- Right click on the saved file, (the icon of this should show as an RGB triangle), and select the top option which is 'Install Profile'.
- If you have Photoshop/Lightroom/Elements open on your computer already, close and re-open them to refresh and bring the profile into the application.
- To find your profile in the future, go to your file explorer and enter into the search bar – ' C:\Windows\System32\spool\drivers\color ' which will take you to the profiles folder on your computer.
- To un-install your profile from your computer, go to the profile as shown in No.5 and delete it.

- Start by saving your profile from the email to your desktop.

- 
- Enclosing Folder 387

Using your Profiles Photoshop.

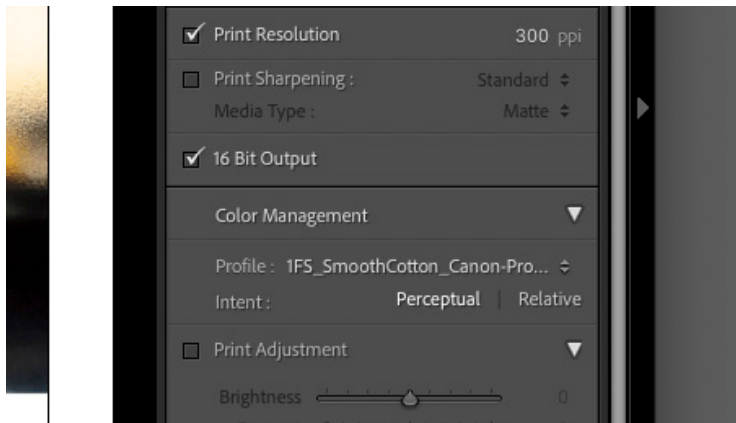

To use the profiles within Photoshop you will need to:

- Set 'Color Handling' to 'Photoshop manages colors' Under this select the profiles for your paper in the dropdown, N.B. All Fotospeed profile start "1FS" The next step will be to enter Print Settings and set the media type and turn off colour management as you did when printing the charts.

**Always remember to turn off
Colour Management when
printing with a profile.**

Using your Profiles Lightroom

To use the profiles within Lightroom you will need to:

- Under the color Management section in the print tab click on the dropdown "Profile" menu. Within this dropdown select "Other" Tick the profiles you have installed from Fotospeed. The profiles will
- now show within the dropdown list under profiles. Now select the profile you'd like to use and click "Printer" From the "Printer menu" please set your media
- type and turn off Colour Management. As you did when printing the test chart.
